SCOPE OF WORK:

The City of Martinsville would like to replace our existing Manual Trash Rake System at our Hydro Generation Plant with an Automated Trash Rake System. The existing Trash Rake clears any debris that floats down the river and blocks the inlet for the Power House. The leaves and brush can be quite heavy at times especially during high water levels and in the Fall. There are two screened Head Gates for the Inlet to the Power House that are 15 ft. across and 16 ft. in length. The current Trash Rake travels 37 ft. to discard the debris. The rake in service has teeth that penetrate the grates to keep the inlet clear. We have Siemens controls that we would like to integrate into the automation of the Trash Rake. The successful vendor must furnish all material, equipment, and labor for the complete installation of this new automated trash rake system. The City has installed conduit near the equipment to be automated. Photos are included with this proposal. The City will be responsible for the removal and disposal of the existing trash rake. Please contact Jimmy Blankenship at jblankenship@ci.martinsville.va.us or by cell phone at 276-252-7672 to schedule an on-site inspection of the job site.
